## **KPS & Associates Inc**

KPS & Associates Inc. (KPS&A Inc.), located in Edmonton Alberta Canada, is a federally incorporated company which provides a broad spectrum of **Transportation Safety related services** tailored for each client company's unique needs. As an advocate to both government and private sector stakeholders, KPS&A Inc. provides for improved transportation Quality Assurance Standards. KPS&A Inc. is unrivalled in terms of customer satisfaction and continues to set the highest standards in this evolving industry.

Since 1988 we have operated as **consultants and advisors** to many diverse equipment related projects. The management of people and their abilities to operate equipment has been the continuing theme throughout these projects. These range from developing hardware/software for the electronic monitoring of persons and equipment to the safety and well being of personnel on remote job sites (i.e., horizontal directionally drilled river crossings). Other projects have involved the management of heavy equipment, specialized chemical transportation and upstream oil production.

KPS&A Inc. Professional Services provides a **broad spectrum of Transportation-related services**, including Training, Auditing, Technical Writing, Compliance Management Outsourcing and Document Management. KPS&A Inc.'s certified Project Management team ensures that each engagement is well defined and professionally executed, on time and on budget.

We have developed and put in place **Health Safety and Environmental programs**, including **Policies and Procedures manuals**, for over 250 different companies in Western Canada. Most of these companies came to us in some form of compliance duress. All but a handful are now clear of any intervention process.

Having traveled all over North America, we possess a very clear understanding of distribution systems, just in time logistics and border crossing procedures. We are very familiar with the **Canadian NSC** and the **USDOT CDL** and **OSHA** programs.

We excel in areas of **formal training** and have produced 16 programs. These programs encompass Fatigue Management, Legislation Interpretation, Audits, Safety and Instructor Training to name a few. We are currently developing **web enabled training programs**, audit and inspection models as well as consultative access to our knowledgebase and professional trainer development.

Our **company philosophy** is to provide reliable services, exceptional support and affordable pricing to individuals and businesses for their unique projects. To continuously achieve our own high standards, KPS&A Inc. employs experienced and talented professionals and has furthermore built a large network of independent and affiliated specialists.

Our team consists of **highly experience and energetic professionals, dedicated to providing excellence** in transportation safety and services.
